

Support Issues of Fiorano:

SI-1

Issue: Customer faced an issue while starting the FPS server and then when they see the terminal it gives this error

```
LifecycleManager ERROR Could not make a transition from state CREATING to CREATED for  
component Fiorano.etc: ServiceType=FPSLicenseListener,Name=FPSLicenseListener ::  
com.fiorano.license.LicenseException: The (FPS;13;HA) license has expired!
```

Solution: The SOA license has expired, So please generate a new license if you know how to Else contact Fiorano team and get new licenses. Post that bring down the ESB servers (FES and FPS) and replace the existing SOA license file with the new one and start the ESB servers. This should resolve the issue.
